FOOD CHOICE AND SUSTAINABILITY

Why Buying Local, Eating Less Meat, and Taking Baby Steps Won't Work

"The importance of Dr. Richard Oppenlander's work to save planet Earth and its animal inhabitants exceeds the importance of reversing epidemic diseases of gluttony, including heart disease, diabetes, and cancer."

~John McDougall, MD, Internist, Author, and Researcher

"Comfortably Unaware explains, so clearly, how what we choose to eat has a direct impact on the health of Planet Earth: how modern agro-business and our thoughtless appetites are, quite literally, destroying the environment and the future of our children. I urge you to read it, to think about its message, discuss it with your friends – and start to change the world, one bite, one meal, one diet at a time."

– Jane Goodall, PhD, DBE,
UN Messenger of Peace
